PROFESSIONAL SUMMARY

Third-year BS Information Technology student specializing in Web and Mobile Applications, with freelance experience building responsive business websites and hands-on practice across React, Python, Flask, responsive UI, SEO-focused content structure, testing, deployment, and web security. Seeking a web development internship where I can contribute carefully, learn from experienced engineers, and grow through real product work.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, React, Tailwind CSS, responsive design, mobile-first layouts
Backend	Python, Flask, REST API fundamentals, Jinja templates, PHP fundamentals
Tools	Visual Studio Code, Git, GitHub, npm, Vite, MySQL fundamentals, Android Studio
Testing & QA	Vitest, Pytest, responsive QA, accessibility checks, keyboard interaction testing
Security	Content Security Policy, HSTS, clickjacking protection, MIME-sniffing protection, CORS controls, environment configuration
Performance	WebP asset optimization, lazy-loaded screenshots, on-demand media loading, reduced-motion support
Programming & Mobile	Java, C++, object-oriented programming fundamentals, Dart, Flutter, Kotlin basics

FREELANCE EXPERIENCE

Freelance Web Developer	Selected client projects
Independent project work Responsive websites, practical user flows, and deployment-ready delivery	
- Designed and built responsive business websites from content structure and interface implementation through deployment-ready polish. - Developed the R.M Mendezabal Construction Supplies Trading Website with React and Python, including clear service content, responsive presentation, and SEO-focused page structure. - Built the Flexsol Storage Corp. Website with Flask and Jinja templates, including project information, contact actions, on-demand media, and security headers. - Managed project delivery with Git and GitHub, optimized WebP screenshots below 500 KB, and performed desktop, mobile, accessibility, and keyboard QA.	
React.js Python Flask HTML CSS JavaScript Git GitHub Vercel	

SELECTED PERSONAL PROJECT

Full-Stack Developer Portfolio	2026
Personal project github.com/kad3nc3	
- Built a responsive React and Tailwind CSS portfolio with reusable sections, mobile navigation, iOS-inspired interface styling, project screenshot lightboxes, and accessible controls. - Implemented a Flask contact service with server-side validation, generic error responses, request-size handling, environment-only SMTP credentials, and automated tests. - Added deployment headers, crawler guidance, safe external links, optimized assets, reduced-motion support, and a documented GitHub workflow.	
React Vite Tailwind CSS Framer Motion Vitest Python Flask Pytest Vercel	

EDUCATION

FEU Alabang	2023 - Present
Bachelor of Science in Information Technology Specialization in Web and Mobile Applications	

ACADEMIC FOUNDATIONS

Web & Database	Mobile Applications
Responsive HTML and CSS interfaces, PHP fundamentals, MySQL fundamentals, database design, and queries.	Academic mobile application work using Dart and Flutter with interface layouts, navigation, and core functionality.
